

## **System Enhancement on QR**

System enhancement on the QR will be launched on 14 June 2010; afterwards, system testing will be conducted for the following week. New features aiming to increase the user-friendliness of the QR and cover all the three interfaces of the QR – interfaces with the public, operators, and the QR Administrator – are introduced. These include both the search and download functions of the system, amongst other items, as below:

### On the Public Interface

- Enhanced layout for record display;
- Enhanced search criteria/options, embracing also the search on qualifications under the Recognition of Prior Learning (RPL) mechanism;
- Enhanced keyword search;
- New download function.

### On the Operator Interface

- Flexibility for change in the Operator/Agency Reference Code;
- New download functions for retrieving operator profile and published qualification details;
- Enhanced search options.

### Further Information

- Explanation on the glossary terms is available through a simple click at the concerned term.
- Updated User Guide of the system is available for easy reference from 21 June 2010 onwards.
