

## **Enhancement of “Export” Function of Published QR Records in the QR “Operator/Agency Inbox”**

To enhance the usage and usability of the “Export” function in the QR “Operator/Agency Inbox” and to facilitate operators to export their published QR records in a more specific and convenient way, the QR system features in the QR “Operator/Agency Inbox” are now optimised, as follows:

- (1) The input of the “Keywords” data field in the qualification uploading process is changed from mandatory to optional; and
- (2) The incorporation of the following four additional selection criteria in the QR “Operator/Agency Inbox”:
  - (a) Registration Status;
  - (b) QR Registration Number;
  - (c) Title of Qualification; and
  - (d) Types of Qualification.
